6'5" (196cm)	270lb (122.4kg)

This chart is intended to be a guide for maximum weight for height. Not every body type can safely be harnessed for skydiving, but if you weigh less than the maximum weight for your height in this chart, we should be able to harness you safely to skydive. If in doubt, or your weight exceeds the maximum weight for your height, contact us by phone or email to get a personal assessment.

Our maximum weight is 270lbs, on our scale, in the clothes you will wear during your skydive.
